

Anoka County Highway Department

Mission & Vision

Our *Vision* is to enhance and protect life by providing safe roads and eliminating congestion.

Each section of the department contributes to this vision with teams of skilled professionals fulfilling a specific *Mission*:

- The Road Maintenance section protects, preserves, and improves travel on our highway system.
- The Signal Service section enhances our highway system by implementing traffic control technology to minimize delays and maximize safety.
- The Fleet Services section supports the highway operations by providing highly effective and efficient maintenance of the fleet and equipment.
- The Engineering section, through collaborative partnerships, delivers high quality cost effective highway projects.
- The Planning section directs and facilitates mid and long range projects and plans to meet public needs.
- The Transportation Management Organization (TMO) section educates the public on transportation alternatives and construction projects.
- The Traffic Service section provides traffic engineering analysis and evaluations to monitor and plan for safer highways.
- The Administration section provides direction and support for all Highway Department operations.

Values

We will live our values by striving to have a work environment consisting of:

- Collaboration / Teamwork
- Respect
- Communication
- Integrity
- Personal Accountability
