QUALITY child care

MATTERS.

YOU provide a solid beginning for children when you...

...**TALK** with children throughout the day, smile at eye level and get to know each child well.

...**HELP** children learn and grow through planned play.

...**CARE** for children in small groups so they receive the time and attention they need from you.

...**REMEMBER** that the more you learn the more the children in your care will learn. Stay knowledgeable about caring for children and takes classes to keep your learning current.

...**PREPARE** to keep the children safe and healthy. All the effort you put into hand-washing, healthy meals and safety training pays off in happier, healthier children.

Child Care Resource and Referral is now
Child Care Aware of Minnesota.
